

CENTRE FOR PROFESSIONAL SKILLS DEVELOPMENT IN PUBLIC HEALTH (CPSD)

- **57** Short Courses, Seminars and Workshops in 2020
- **190+** Short Courses, Seminars and Workshops to Date

The Centre for Professional Skills Development on Public Health (CPSD) offers unique and innovative pedagogic methods such as:

- Interactive discussions, experiential learning exposures, community and facility visits, multi-media engagement, role-playing, and other forms of hands-on practical learning.
- Fundamental skill-based courses on monitoring and evaluation, and workshops on scientific writing skills.
- Critical courses on quantitative and qualitative research methodologies for improving the capacity of programme and project implementers

CPSD provides the opportunity to learn from experts across the fields through courses that are offered by the School in partnership with the Centres of Excellence, according to their areas of focus. The training programs have a diverse range of expert facilitators which include public health practitioners, medical professionals, anthropologists, health economists, ethnographers, statisticians, development practitioners, policy makers, program managers, and academics from well-established international institutions and national institutions. The training programs include a wide range of participants including government officials, medical doctors, senior health education officers, senior staff nurses, statisticians, NGO sector specialists, development practitioners, programme officers and managers, academics, researchers, activists, journalists and individuals from marginalized communities.

2020

In addition to the training programmes in 2020, Center for Professional Skills Development on Public Health (CPSD) received, on 1 November 2020, a grant of BDT 14,514,000 (US\$174,867) from Bangladesh Health Watch (BHW) which is funded by SIDA. An agreement has been signed between BRAC James P Grant School of Public Health, BRAC University and BHW. Under this agreement, CPSD will undertake 12 short courses and one pilot course between 2021 and 2022 under these following four themes:

- COVID-19 and its containment in Bangladesh: equity, voice and governance
- Transparency for Good Governance
- Voice and Participation
- Equity for Accessing Health Services

Approximately 300 participants will be trained between 2021 and 2022. The potential participants will be programme planners and managers of the government, NGO and private sector, University faculty (particularly public health), and other professionals in the health sector, and journalists.

Experiential learning methodology will be followed to conduct these short courses. A feedback session will be organized after completion of each course which will be useful for refining course content in the future. Additionally, each participant would develop an action plan after training: on how he/she would implement the newly acquired knowledge and skills in the field.

TRAINING ACTIVITIES HOSTED UNDER THE ARISE PROJECT

- **6 days long extensive Integrated Training on Capacity strengthening for Community-Based Participatory Research (CBPR). Also visited the field and tested the Arise Bangladesh tools**

Date: 11-16 January 2020

Participants:

ARISE team members

Description:

The training was facilitated by Kim Ozano and Mr. Awlad Hossain, Monitoring, Evaluation, Quality Assurance Specialist of Orbis International. Kim Ozano shared her expertise on CBPR methods and helped us apply the methods in the field, as part of pre-testing of our qualitative tools. The training was on different research tools like Participatory Research Action (PRA), In-depth interview (IDI), Transect walk, Key Informant Interview (KII), Photo voice with IDI, community mapping, problem tree analysis etc. They shared their varied experiences in different fields and contexts while applying such research tools. The thorough overview and exercise was effective, in addition to the field work methods taught as well.

- **Training on GIS Mapping**

Date: January 2020

Participants: ARISE team members

Description:

One day training session by Mr. Abdul Awal, Research Associate of BRAC James P Grant School of Public Health. Point mapping, line mapping etc. was taught in the session. The ARISE team members received a general overview on GIS mapping and had an exercise to conduct.

- **Session on Safeguarding**

Date: January 2020

Participants: ARISE team members

Description:

This session was initiated by Sally Theobald, Social scientist from Liverpool School of Tropical Medicine (LSTM). She mentioned the policy and afterwards around four case scenarios were given which enabled participants to understand the concept and how it can be viewed from different perspectives and situations.

ORIENTATION ON IMPLEMENTATION RESEARCH (IR)

Participants: 29 | Duration: 01 Day

Date: 18 January, 2020

Facilitators:

Dr. Malabika Sarker, PhD is a Professor and Associate Dean, Director Research, Director Center of Excellence for Science of Implementation & Scale Up (CoE-SISU) at BRAC James P Grant School of Public Health and Research Advisor, BRAC University.

Dr. Shaikh A. Shahed Hossain, PhD, Professor, James P. Grant School of Public Health, BRAC University and Consultant Scientist, Health Systems and Population Studies Division, icddr,b.

Description:

The purpose of this one-day training module is to orient early career academicians to the concept of Implementation Research (IR) and its use in understanding and addressing barriers to effective and quality delivery of health interventions, strategies and policies in health systems. In particular, this module will offer an introductory understanding of the concepts, process and key practical issues and considerations related to designing and implementing an implementation research. At the end of the course, the participants will have a good overall understanding of the following:

- What Implementation Research is, how this is different than traditional research approach in Public health or social science?
- Why we need Implementation Research in public health and beyond
- How Implementation Research can contribute to developing better Health Systems

Implemented By: Center of Excellence for Science of implementation and Scale up (CoE-SISU)

Organized by: Centre for Professional Skills Development on Public Health (CPSD), BRAC James P Grant School of Public Health, BRAC University.

EXPLORING THE FEASIBILITY OF COLLECTING A CORE SET OF INDICATORS FOR MONITORING AND EVALUATING SEXUAL, REPRODUCTIVE, MATERNAL, NEWBORN, AND ADOLESCENT HEALTH SERVICES AND OUTCOMES IN HUMANITARIAN SETTINGS

Participants: 3 | Duration: 1 Day

Date: 6 February 2020

Facilitators:

Dr. Angel Foster, University of Ottawa

Description:

In the beginning of the training, the international PI shared the overview of the project with the country team. The main discussion was about the list of indicators and the rationale behind the indicators. The training also discussed the data collection methods of the project.

Organized by: Dr. Angel Foster, University of Ottawa

SHORT COURSE ON FUNDAMENTALS OF QUALITATIVE RESEARCH “THINKING QUALITATIVELY”

Participants: 27 | Duration: 03 Days

Date: 25, 26 & 27 February, 2020

Facilitators:

Dr. Shahaduz Zaman has an interdisciplinary background with a PhD in Medical Anthropology, Master's in Public Health and Bachelor in Medicine. He is currently working as a Reader in Medical Anthropology and Global Health at the Department of Global Health and Infection, University of Sussex, UK.

Description:

During the past decade, there has been an increasing use of qualitative research across various disciplines. It is now well acknowledged that complexity of human life can not only be captured through quantitative means. Qualitative research is used to gain an understanding of underlying reasons, opinions, and motivations.

It provides insights into the problem or helps to develop ideas or hypotheses for potential quantitative research. In this training workshop participants will be introduced to the basic ideas behind the qualitative research. They will learn about data collection, analysis and interpretation in qualitative research.

Organized by: Centre for Professional Skills Development on Public Health (CPSD), BRAC James P Grant School of Public Health, BRAC University.

TRAINING ON “ASSESSMENT OF POST-CRASH CARE SYSTEM FOLLOWING ROAD TRAFFIC ACCIDENTS IN SELECTED AREAS OF BANGLADESH” PROJECT

Participants: 8 | Duration: 3 days

Date: 25-27 February 2020

Facilitators:

Dr. Nahitun Naher, Senior Research Fellow, BRAC James P. Grant School of Public Health; Mir Raihanul Islam, Senior Research Associate, BRAC James P. Grant School of Public Health.

Description:

A three-day long training was organized for the field team dated 25-27 February, 2020 at BRAC JAMES P. GRANT SCHOOL OF PUBLIC HEALTH, BRAC UNIVERSITY. The training consisted of the overview of the post-crash care assessment study, research methodology, research ethics and extensive discussion on study tools. The training also included participatory discussion, role-playing, mock-tests, and in-house pre-testing. End-of-training debriefings and necessary feedback, suggestions, and guidance were provided by the core research team.

Organized by:

Centre of Excellence for Health Systems and Universal Health Coverage (CoE-HS&UHC), BRAC James P. Grant School of Public Health.

SHORT COURSE ON QUANTITATIVE DATA ANALYSIS USING STATA

Participants: 17 | Duration: 05 Days

Date: 8-12 March, 2020

Facilitators:

Dr Malay Kanti Mridha is an Associate Professor of the BRAC James P Grant School of Public Health, BRAC University. He is also the Director of the Center of Excellence for Non-communicable Diseases and Nutrition.

Dr Md Tanvir Hasan is an Assistant Professor and Co-Director of Centre of Excellence for Urban Equity and Health (CUEH), BRAC James P Grant School of Public Health, BRAC University.

Description:

Quantitative research, the most popular concurrent method of conducting a research is defined as a systematic investigation of phenomena by gathering quantifiable data and performing statistical, mathematical, or computational techniques. Quantitative research is widely used in psychology, economics, demography, sociology, marketing, community health, health & human development, gender

studies, and political science. STATA is one of the most commonly used statistical software for data analysis of quantitative research which is used by academics, researchers & public health practitioners and many others. It is a complete, integrated software package which provides everything that data science needs, including data management, visualization, statistics and automated reporting.

In response to the growing demand for training in statistical methods and use of statistical software, this course is the first one of a series of courses to be offered by CPSD on application of STATA. It is a five days course which is designed with a view to helping academics, researchers, analysts and professionals coming from different backgrounds to learn statistical computing and apply this knowledge in their respective fields.

This course is expected to provide participants with an introduction to STATA including data management, performing statistical analysis such as statistical tests and regression modelling, producing & interpreting statistical tables & graphs to display quantitative information.

Organized by: Centre for Professional Skills Development on Public Health (CPSD), BRAC James P Grant School of Public Health, BRAC University.

TRAINING OF TRAINERS CONSORTIUM MEETING

Participants: 15 | Duration: 5 days

Date: 9-13 March 2020

Facilitators:

Olakunle O. Alonge, Assistant Professor, International Health (Primary), Division: Health Systems, Johns Hopkins Bloomberg School of Public Health; Svea Closser, Associate Professor, International Health (Primary), Division: Social and Behavioral Interventions, Johns Hopkins Bloomberg School of Public Health; Anna Kalbarczyk, Assistant Director, Johns Hopkins Center for Global Health.

Description:

The ‘Synthesis and Translation of Research and Innovations from Polio Eradication (STRIPE)’ consortium focused on knowledge mapping activities in year 1, knowledge synthesis and development of the course in year 2. The course includes 12 modules under various global knowledge domains. This Training of the Trainers (ToT) meeting was organized at John Hopkins University (JHU) Campus, Baltimore, USA to demonstrate different teaching techniques to the STRIPE teaching team members. STRIPE members were from Afghanistan, Bangladesh, DRC, Ethiopia, Nigeria. Members from John Hopkins University also took part in the training. As a consequence of the COVID-19 Pandemic, India and Indonesia attended virtually.

The teaching techniques were covered under the ToT: Course Evaluation, Lecture Approach, Case Study, Approach, Flipped Classroom, Discussion approach, Debate, Theory of change and quality, improvement/ IR tools, Audio and video recording of the lectures and discussions

Organized by: John Hopkins University, Baltimore, USA

TRAINING ON GENDER AND ADOLESCENCE: GLOBAL EVIDENCE (GAGE) TOOLS

Participants: 7 | Duration: 3 days

Date: 12, 15 and 16 March 2020

Facilitators:

Mohammad Riaz Hossain, Assistant Project Coordinator, BRAC James P Grant School of Public Health, BRAC University; AKM Mazharul Islam, Adjunct Professor, BRAC James P Grant School of Public Health, BRAC University; Maheen Sultan, Acting Head and Senior Fellow of Practice, BRAC Institute for Governance and Development (BIGD); Dr. Sabina Faiz Rashid, Dean and Professor, BRAC James P Grant School of Public Health, BRAC University; and Director of CGSRHR

Description:

This training programme, funded and partnered by GAGE ODI, held at BRAC James P Grant School of Public Health, BRAC University was conducted with the following objectives:

- Understanding the objectives and methodology of GAGE research projects.
- Understanding ethical issues in GAGE research projects.
- Understanding and practicing the GAGE qualitative research tools for skillful data collection.
- Learning about research sites and research samples.
- Learning about data management.

Organized by:

BRAC James P Grant School of Public Health, BRAC University.

TRAINING ON “SKILLS DEMAND ANALYSIS OF HEALTH CARE SERVICES IN BANGLADESH, 2020” PROJECT

Participants: 8 | Duration: 2 days

Date: 19-20 July 2020

Facilitators:

Dr. Nahitun Naher, Senior Research Fellow, BRAC James P. Grant School of Public Health; Mir Raihanul Islam, Senior Research Associate, BRAC James P. Grant School of Public Health.

Description:

An online (Zoom) group training was organized for the study team members. First half of the day one training consisted of participatory discussion on study background, objective, method, data collection

plan and quality control measures. Second half of the training consisted of detailed discussions on the set of tools. On the second day of the training a field pre-testing of the tools was organised. The training ended with debriefings and by providing necessary feedback, suggestions and guidance to the team for quality data collection.

Organized by:

Centre of Excellence for Health Systems and Universal Health Coverage (CoE-HS&UHC), BRAC James P Grant School of Public Health, BRAC University.

ONLINE SHORT COURSE ON BASIC QUANTITATIVE RESEARCH METHODS, DATA ANALYSIS AND REPORT WRITING

Participants: 34 (BRAC International Participants from Different Country) | Duration: 06 Days

Date: 16-21 August, 2020

Facilitators:

Dr Malay Kanti Mridha, Professor, BRAC James P Grant School of Public Health, BRAC University;

Dr Shafiqur Rahman, Professor, ISRT, Dhaka University

Dr Md. Tanvir Hasan, Associate Professor, BRAC James P Grant School of Public Health, BRAC University; Saifa Raz, Research Fellow, BRAC James P Grant School of Public Health, BRAC University;

Md. Uzzal Chowdhury, Senior Statistician, BRAC James P Grant School of Public Health, BRAC University;

Mir Raihanul Islam, Senior Research Associate, BRAC James P Grant School of Public Health, BRAC University;

Abdul Awal, Research Associate, BRAC James P Grant School of Public Health, BRAC University;

Srizan Chowdhury, research Assistant, BRAC James P Grant School of Public Health, BRAC University.

Description:

Quantitative research, the most popular method of conducting a research is defined as a systematic investigation of phenomena by gathering quantifiable data and performing statistical, mathematical, or computational techniques. Quantitative research is widely used in psychology, economics, demography, sociology, marketing, public health & human development. STATA is one of the most commonly used statistical software for data analysis of quantitative research which is used by academics, researchers & public health practitioners and many others. It is a complete, integrated software package which provides everything that data science needs, including data management, visualization, statistics and automated reporting.

This course is expected to provide participants with an introduction to quantitative research and will allow them learn statistics using STATA. It is designed with a view to helping participants coming from different backgrounds to learn statistical computing and apply this knowledge in their respective fields

Organized by:

Centre for Professional Skills Development on Public Health (CPSD), BRAC James P Grant School of Public Health, BRAC University.

ONLINE CAPACITY BUILDING TRAINING ON “QUALITATIVE RESEARCH”

Participants: 18 | Duration: 02 Days

Date: 25-26 August, 2020

Facilitators:

Professor AKM Mazharul Islam has been teaching anthropology for 23 years and Chaired the Department of Anthropology at Shahjalal University of Science and Technology for last 12 years. He is educated in the University of Dhaka, Minnesota State University, USA and Johns Hopkins University, USA. Currently, he is working as an Adjunct Professor at BRAC James P Grant school of Public Health, BRAC University and teaching part time in Dhaka University, North South University and Bangladesh University of Professionals. He was also a Visiting Professor in the Department of Society and Health at Mahidol University, Thailand.

Co-Facilitators:

Tasfiah Jalil, Senior Coordinator, BRAC James P Grant School of Public Health, BRAC University; Rituja Shome, Senior Research Assistant, BRAC James P Grant School of Public Health, BRAC University.

Description:

During the last couple of decades there is an increasing demand of using anthropological research tools across various disciplines. It is now acknowledged globally that the multifaceted complexity of human life can be understood by applying anthropological research methods. It provides an insight into the problems and help gaining a profound understanding of the culture under study.

In this workshop, the participants will be introduced with few important anthropological and qualitative research tools and techniques of data collection. By practically using those tools, they will learn how to collect relevant data, make narratives and analysis and how to interpret those in research.

Implemented By: Right Here Right Now (RHRN), BRAC James P. Grant School of Public Health, BRAC University

Organized by:

Centre for Professional Skills Development on Public Health (CPSD), BRAC James P Grant School of Public Health, BRAC University.

SHORT COURSE ON “EVALUATION OF DEVELOPMENT PROGRAMME” FOR IMED OFFICIALS

Participants: 25 |Duration: 03 Day

Date: 6-8 December, 2020

Facilitators:

Dr. Malabika Sarker, PhD is a Professor and Associate Dean, Director Research, Director Center of Excellence for Science of Implementation & Scale Up (CoE-SISU) at BRAC James P Grant School of Public Health, BRAC University and Research Advisor, BRAC University;

Dr. Yameen Mazumder, Sr. Programme Specialist, BRAC James P Grant School of Public Health, BRAC University;

Dr. Atonu Rabbani, Associate Scientist, BRAC James P Grant School of Public Health, BRAC University;

Dr. Mehedi Hasan, Senior Lecturer BRAC James P Grant School of Public Health, BRAC University;

Dr. Humayra Binte Anwar, Lecturer, BRAC James P Grant School of Public Health, BRAC University;

Description:

This course was part of the UNICEF supported TAPP on ‘Capacity Development for Monitoring and Reporting to Increase Effective Coverage of Basic Social Services for Women and Children’ (CDMRI-ECBSS Phase-II) and addressed the specific objective of developing a national monitoring and evaluation policy, strategy formulation to implement the policy and capacity development of GoB officials on Result Based Monitoring (RBM) based M&E.

Facilitated by:

Center of Excellence for Science of implementation and Scale up (CoE-SISU), BRAC James P Grant School of Public Health, BRAC University.

Organized by:

Centre for Professional Skills Development on Public Health (CPSD), BRAC James P Grant School of Public Health, BRAC University.

SEMINARS (2020)

SEMINAR ON “GEOSPATIAL TECHNOLOGY TO GENERATE ENVIRONMENTAL HEALTH INFORMATION FOR CLINICAL PRACTICES”

Date: 2 January, 2020

Presenters:

Dr. Fazlay S. Faruque is a tenured Professor of Preventive Medicine in the John D. Bower School of Population Health at the University of Mississippi Medical Center (UMMC). He joined UMMC in 2000 as the Director of GIS and Remote Sensing program with a faculty appointment as an Assistant Professor. He has a PhD in Geological Engineering, and for almost thirty years of experience in teaching and research in the areas of geospatial science with a focus on environmental health.

SEMINAR ON "THE PURSUIT OF HAPPINESS"

Date: 9 February, 2020

Presenters:

Sylvia Borren has worked all her life within and for civil society organisations, both professionally and as a volunteer. She was part of the Dutch and global women's and sexual rights movements (COC, ILGA, IWC for a just and sustainable Palestinian- Israeli peace) and is now advisor to the UN Women National Committee Netherlands and ATRIA (Institute on gender equality and women's history). Ms Borren was part of the anti-poverty movement (director of Oxfam Novib 2008-1994, and co-chair of the Global Call to Action against Poverty and EEN).

SEMINAR ON "OUTBREAK OF CORONA VIRUS DISEASE 2019 (COVID-19)"

Date: 19 February, 2020

Special Guest: Professor Vincent Chang, PhD, Vice Chancellor, BRAC University

Presenters (Chief Guest and Keynote Speaker):

Prof. Dr. Meerjady Sabrina Flora, a leading epidemiologist of the country, is the Director of the Institute of Epidemiology, Disease Control and Research (IEDCR), Ministry of Health, Govt. of the Peoples' Republic of Bangladesh which is the nation's focal point for conducting disease surveillance, outbreak investigation, research and training. She is the national spokesperson on COVID-19 activities of the country.

Dr. A S M Alamgir, a leading virologist in the country, is working as Principal Scientific Officer (PSO) in Institute of Epidemiology, Disease Control and Research (IEDCR), Ministry of Health, Govt. of the Peoples' Republic of Bangladesh which is the nation's focal point for conducting disease surveillance, outbreak investigation, research and training. He is coordinating the corona virus disease (COVID-19) Control Room of IEDCR.

TRAINING DURING THE COVID-19 PANDEMIC

To acknowledge the public health emergency and to spread awareness among faculties, students and staff on standard practices during COVID-19 pandemic the institute conducted three internal training sessions, overseen by Professor Kaosar Afsana, between March 1st, 2020, to March 18th, 2020.

- **Weeklong training on Awareness**

The school provided a one-week training session on what the coronavirus is, who gets affected, how to avoid it, etc. The training entailed details of the virus and provided awareness for all faculty members.

- **COVID-19 Training for Support Staff**

The support staff members of the School were also provided with an awareness training on the coronavirus during the first week of March so they could understand the Public Health emergency.

- **WHO Training platform**

The school used the WHO platform for any resources and information on coronavirus early on in march.

The School has been hosting a series of webinars every week since April 2020 to address the public health emergency related to the virus, through sharing of useful resource materials locally and globally to a wider audience, including BRAC University, health organizations, key stakeholders, partners, and networks. Faculties and staff from the school are being invited to webinars hosted by national and international organizations. The School has hosted and participated in more than 37 webinars between April 2020 and December 2020.

**Scan the QR Code at the end to access the videos of all the webinars.*

List of Webinars: COVID-19

Health, Fitness, and Nutrition during COVID-19	3 December 2020
Producing a Safe and Effective Vaccine: Align Public Health Needs with Economic & Social Development Objectives	23 November 2020
Implementation Research: A catalyst for bridging the knowledge gap between Discovery to Delivery	19 November 2020
Community Health Workers During COVID-19	11 October 2020
Role of Informal health providers in COVID-19	13 August 2020
MiB webinar on "Impacts of Coronavirus on Non-Member RMG Factories in Bangladesh"	12 August 2020
Continuation of Midwifery Education During COVID-19 Pandemic	25 August 2020
COVID-19 and Youth Initiatives	12 August 2020
COVID-19: Knowledge, practices, health and socio-economic impact in Bangladesh	14 July, 2020
Impact of COVID-19 shutdown on the Hijra Community	9 July 2020

South Asia: The Public Health Response to COVID-19	2 July 2020
Waste management during COVID-19	1 July 2020
Food consumption among low Income population in Bangladesh during COVID-19: Impact & Recommendations	23 June 2020
Bangladesh Health Watch Dissemination Webinar	20 June 2020
Engaging communities in times of COVID-19	16 June 2020
Immunization backlog during COVID-19 pandemic: A household-based assessment	16 June 2020
Why and how Socio-Anthropology can make a difference in the fight against COVID-19	15 June 2020
Disability and COVID-19	10 June 2020
Webinar Series 38: COVID-19 and Social Sciences	5 June 2020
Successes and Challenges of Public Health Measures and Medical Care in COVID-19 Pandemic and the future	1 June 2020
Post- 'General Holiday' health risks	1 June 2020
Effectiveness of One Health Platforms for Pandemic Preparedness and Response: Lessons Learned	29 May 2020
Impacts of COVID-19 on Tertiary Education: Nations' Responses	29 May 2020
Vulnerable Populations and COVID-19: Bangladesh during a Global Pandemic	27 May 2020
Nutrition for Mother and Children during COVID-19 in Bangladesh	21 May 2020
Gender, Violence and Women's Experiences during COVID-19	20 May 2020
COVID-19 Impact on Urban Informal Settlements: Vulnerabilities, Challenges and Responses from 4 countries	14 May 2020
Targeting COVID-19 relief payments in Bangladesh	7 May 2020
Social Dimensions of a Pandemic: Stigma, Gender and COVID-19	7 May 2020
Startup Talks: The future of healthtech in Bangladesh	5 May 2020
Emotional and Mental Wellbeing during COVID-19: Learning from Diverse Perspectives	5 May 2020
COVID-19: What we know & what we don't know & why this matter	30 April 2020

The Response to COVID-19 in South Asia	17 April 2020
List of Webinars: Non COVID-19	
Colourism in South Asia	24 September 2020
Webinar on Masculinity and Gender Based Violence	17 September 2020
Webinar on Media and Gender	10 September 2020
Rohingya Crisis: A Perspective from Bangladesh	10 July 2020

Several other training components have been prepared by the school during this time period. Moreover, global and local partners of the school have shared training materials with us. Below is the list of these training components:

- **ARISE: Lead partner Liverpool School of Tropical Medicine (LSTM) research consortium with the School, organized webinars and shared 6 resource materials:**
 1. What is COVID-19? Who is more vulnerable?
https://www.youtube.com/watch?v=PFMPuc_Ho8Q&feature=emb_title
 2. Preventable measures? Treatment at home?
https://www.youtube.com/watch?v=Hf8SRM7_tRc&feature=emb_title
 3. Reliable sources of information on COVID-19?
https://www.youtube.com/watch?v=c8gFMyeuknU&feature=emb_title
 4. How to maintain good mental health?
https://www.youtube.com/watch?v=DD8zIduKnn8&feature=emb_title
 5. Test trace isolate protect - Nazeem official video
https://www.youtube.com/watch?v=nFEBBAUZDvI&feature=emb_title
 6. COVID ready - Nazeem official video
https://www.youtube.com/watch?v=gfye0q3v10w&feature=emb_title

- **HOME CARE TRAINING: Training materials were created by JPGSPH on how to take care of oneself when at home with COVID-19 or taking care of someone else with COVID-19. The training was developed in English and Bangla:**
 1. Home Care Recommendation (English)
https://COVID-bracjpgsph.org/assets/files/homeCare/Home-care-recommendation_English_09%2006%202020%20_English.pdf
 2. Home Care Recommendation (Bangla)
https://COVID-bracjpgsph.org/assets/files/homeCare/Home-care-recommendation_Bangla_09%2006%202020.pdf

- **An orientation and awareness program on COVID-19 was organized for the staff of the BRAC Learning Center (BLC), at Niketon, Dhaka, where the Master of Public Health international students reside.**
